Who: Club presidents, District Leadership and other interested Rotarians

Come join your fellow club presidents, president-elects and other interested Rotarians and the district leadership for a sunset flight of networking and Rotary fellowship among the very unique functional art and Aircraft history of Moto Art.

Moto Art & Showroom Gallery

While every piece that MotoArt creates is obviously a work of art, they're also a piece of aviation history. MotoArt knows that every propeller has a story

and each aileron has a rich background. From flying the friendly skies as one of the largest airliners ever created to taking part in the Doolittle Raid during World War II, these engineering marvels from yesteryear deserve the respect that MotoArt puts into every piece. Take a flight into history and learn some interesting facts about these masters of the skies.
